NLP-driven analysis of media discourses on Israel and Palestine

Who we are

Roza Bracic
Jorge Crespo Rubio
Nicola Roos
Marleen Wolting

Main goal

Do news organizations report differently on Israel and Palestine based on the organizations' political leanings and origin countries?

Methodology

1. Process texts
2. Apply topic modeling
3. Compare results across news organizations

Project supervisor

Maddalena Ghiotto, PhD candidate @ VU

Dataset

News articles about selected events (2023-2024) from different news channels

Expected results

Observable biases in framing:
- right-leaning more pro-Isreal
- aligned with government's stance
